Software Requirements Specification (SRS)

Purpose

Give the product (software) name and describe the purpose of it.

Team

List the name of the team and all student team members

Market Comparisons

Provide a list of similar products in the market. Give reasoning why your software is to be better or the best.

Overview

Overall Description

- Product Functions
    - Summarize the major functions the software will perform.
- Operating Environment
    - Specify the hardware and/or network environment in which the software will operate.
- Design and Implementation Constraints
    - List any constraints that may affect the design or implementation.
- Assumptions and Dependencies
    - Give any assumptions made during the requirements gathering and any dependencies on other systems or technologies.

Specific Requirements

- Functional Requirements
- Non-functional Requirements
- External Interface Requirements
    - Define the external interfaces the software will interact with.

- Use Case
    - A diagram representing the system components.
